AUS CIVS

Chart 5
on the
Veterinary
Situation

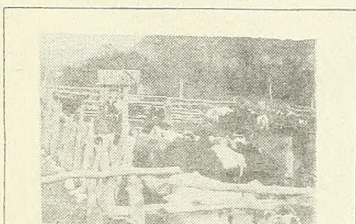

NATURE OF VETERINARY DUTIES

IN THE BUREAU OF ANIMAL INDUSTRY

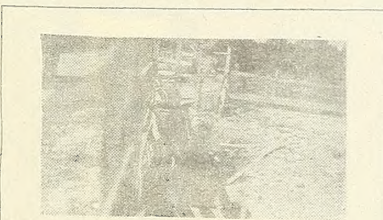

With Special Reference to Personal Hazards and Economic Responsibility

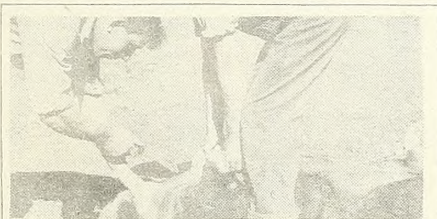

Meat Inspection
involves exposure to diseased tissues, knife cuts, etc.

Tuberculosis Eradication
involves working among wild range cattle

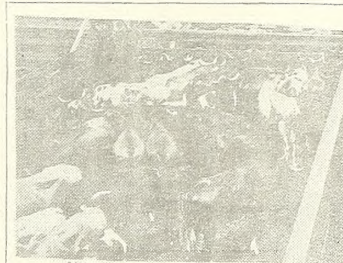

Tick Eradication
—this is a dynamited dipping vat illustrating operation

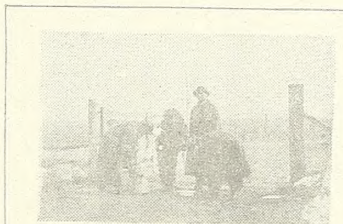

Hog-Cholera Control
A post-mortem — no place for weak nerves or faint hearts

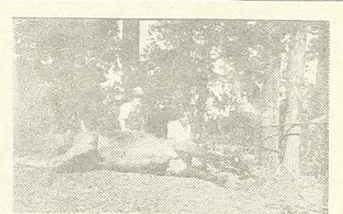

Ante-mortem Inspection
Walking slippery fences is incidental to the work

Stock yards Inspection
involves handling fractious cattle, often also

Eradicating Foot-and-Mouth Disease
Inspectors must wear rubber suits, winter of summer

Livestock-Quarantine Work
Taking blood sample from camel — necessary but dangerous

D-5-847
